

List of EPIC: Enterprise Portfolio of Projects (Feb. 2018)

Enterprise Portfolio of Projects		
Priority	Project	Description
1	VIP Planning & Advising for Student Success – EAB Navigate	Provide a solution for all 23 VCCS colleges with Onboarding and Advising support services. This system will help colleges operationalize a comprehensive guided pathways approach to student success, which includes providing students with real-time info.
2	Identity and Access Management	Identity and Access Management (IAM) is comprised of processes, automated tools, and reporting capabilities that are required to maintain digital identities and provide secure access to systems and resources throughout the VCCS. Enterprise IAM will enable systematic and uniform enforcement of security standards throughout all of the colleges and the System Office.
3	VCCS Admissions Application Project	Includes the development of a streamlined admission applications process and reports and integration into the Virginia Educational Wizard, college websites, and SIS.
4	ERP: AIS Upgrade	The VCCS uses an expiring version of Oracle PeopleSoft Financial Management Solution (PeopleSoft FMS – also known as AIS). The intent of this project is to upgrade our existing AIS solution to a newer version of Oracle PeopleSoft and leverage new business functionality that is available.
5	Learning Management System	This project will deliver a modern Learning Management System (LMS) that makes teaching and learning easier by providing pedagogical flexibility and the ability to capitalize on technology advancements. A new Learning Management System - with inherent OER functionality - will encourage course content sharing among VCCS faculty and it will facilitate the integration of global OER content into VCCS courses.
6	Schedule Optimization for Student Success – Platinum Analytics	Ad Astra Platinum Analytics will generate course scheduling recommendations for each college for each semester. Course recommendations will be derived from a number of relevant factors including students' program of studies and academic progress.

7	Library Management System	Purchase and implementation of a modern, scalable enterprise system that provides management for all library assets, and compatibility with next-generation library systems in use at consortia partner institutions statewide. This system will also provide web-based access to electronic content – accounting for at least 60% of VCCS’s library collections.
8	Enterprise Portfolio and Project Management (PPM) System	The Portfolio and Project Management (PPM) System will be comprised of integrative policies, business processes, hosted software, and real-time data regarding the portfolio of proposed investments, Shared Service initiatives and projects, approved and active projects, Strategic Sourcing procurements, and VCCS grants.
9	Facilities Portfolio and Project Management (PPM) System	System will collect, process, and store requisite information for the design and construction of VCCS capital projects. This system will enable the System Office Facilities Management to track and manage all capital projects throughout their lifecycle - initial college request process, State Board and General Assembly approval process, Bureau of Capital Outlay Management approvals for funding and design, and the actual construction of the facility.
10	WES Workforce Credential Grant Enhancements	WES became fully operational in late 2015, providing all colleges with an online noncredit registration system that is integrated with PeopleSoft. The scope includes enhancements to address limitations, improve reporting accuracy and enhance usability.
11	Virginia Financial Success Network - Workforce Innovation Fund Grant (Benefits Bank)	A benefits application filer and an IRS-certified tax assistance and filing service for state and federal tax returns, implemented in support of the Working Families Success Network (WFSN) model of bundled service delivery.
12	Barnes & Noble (B&N) Financial Aid Interface	This interface will allow NVCC and TCC students to use their available financial aid in real time at the B&N Point of Sale stations.
